I am a Full stack web developer who has previous experience as a programmer for the Banking Foreign Exchange departments and as a Math teacher. I am skilled in Ruby on Rails, JavaScript, HTML/CSS and React/Redux. I bring with me strong interpersonal and analytical skills and am looking forward to using them in web development.

TECHNICAL PROJECTS

Our Family - [YouTube](#)

An app that allows parents / teachers to record children's milestones, and allows siblings to record nice deeds / kind words.

- Used Ruby on Rails on the backend to manage the data.
- Data transfer is handled by JSON and frontend pages are rendered in React / Redux with usage of CSS and JavaScript.

School Grades - [YouTube](#)

An app that allows teachers and students to manage subjects and their corresponding assignments.

- Utilized Ruby on Rails to manage related data through complex forms and RESTful routes.
- Displayed pages via JavaScript with a JSON backend in response to AJAX requests.
- Designed the authentication system to allow login from Google.

ToDoTasks - [GitHub Frontend](#) | [GitHub Backend](#)

An app that allows users to record and manage projects and their various tasks.

- Designed an MVC Sinatra application using ActiveRecord.
- Created this custom app to track projects and tasks for different users, using RESTful routes and that provide for easy data manipulation.

Apartments - [GitHub](#)

A Ruby Gem that provides the latest NYC rentals listed in craigslist with pertinent details for a selected apartment.

- Outlined this Ruby gem that provides a Command Line Interface (CLI) to an external data source.
- Composed as an Object Oriented Ruby application that will scrape data from craigslist.
- Published this gem in RubyGems.org.

TECHNICAL SKILLS

React, Redux, Ruby, Python, Nokogiri, Sinatra, Rails, TypeScript, Javascript, Node.js, SQL, ActiveRecord, Git, HTML, CSS, Bootstrap

RELEVANT EXPERIENCE

CJA School, Myrtle Beach, SC | *Math Teacher and Events Coordinator* | 1997 - 2015

- Designed and taught Math curriculum for students in grades 7-10
- Built and maintained report cards application designed to accommodate school's specifications
- Initiated and led school-wide projects and competitions
- Planned and coordinated special events for school mothers

Comtex, NY | *Consultant* | 1995 - 1997

- Designed, developed and implemented the RIDER tool, which facilitates the correction of mispostings that created inter entity differences at JPMorgan
- Trained and supported investment bankers and traders in the use of the application
- Led development of in-house software for the foreign exchange trading floor and the FX operations department at RBNBY
- Served as liaison for PERFECT MATCH, a vendor package that auto matches incoming and outgoing FX deals confirmations

EDUCATION
